previous iteration

We will get you onto...

## £5 BILLION SPEND NETWORK SERVICES 3

Crown Commercial Service  
**RM6147**

### THE BREAKDOWN

- This framework will provide telecommunication services to the entire Public Sector, their associated bodies and agencies, the voluntary sector, and charities.
- The services available will consist of a range of primary and ancillary services, such as internet access, WiFi, radio, security and surveillance, audio and video conferencing, equipment, and maintenance and support services.
- This agreement is needed to help the Government and Department for Digital, Culture, Media & Sport achieve their ambitions with the Gigabit Project and the attempt to cover areas with poor or no connections.
- With the Public Sector's reliance on high-speed networks, the telecoms and digital infrastructure is unsurprisingly ever-changing.

### THE KEY STATS

- **£5bn** spend value
- **4 year** duration April 2023 - April 2027
- **Tender release date:** October 2022
- **SME Agenda** - 50% goes to SMEs
- **Direct contact** with Public Sector buyers
- **Competitive** pricing
