£1 BILLION SPEND DEMAND MANAGEMENT & RENEWABLES (HELGA 2)

Crown Commercial Service
RM6314

THE BREAKDOWN

- This framework will provide a route to market for a range of energy products and services to support the public sector carbon net zero strategy.
- As there is a greater concern towards climate change and its possible disastrous consequences, it is important that there is greater opportunity for companies and suppliers to engage in energy methods that are renewable and better for the environment. Furthermore, this framework will also provide a valuable commercial opportunity for renewable and carbon net zero companies to engage with, allowing the economy to become greener.

THE KEY STATS

- **£1bn** spend value
- **4 year** duration
- **SME Agenda** - £1 in every £3 is mandated to SMEs
- **Direct Award** available
- **Access** to a quick route to market to **support carbon reduction targets**
