on all questions***

*Based on learnings from previous iteration

The Breakdown

Following Cyber Security Services 2 and a one-year review of the National Cyber Security Strategy, the Government have identified the need for an external enterprise to better enhance cyber security and safety.

This takes the form of Cyber Security Services 3 which offers Risk Assessment and Management, Security Architecture, Audit and Review, Cyber Incident Response, and Technology Solutions, as well as the previous services which have been offered in the past two frameworks. The framework is representative of the Government stepping up its cyber security in conformity to its 2016-2021 strategy.

In the long-term, the Government has acknowledged its desire to embed "cyber security into policy making, regulatory frameworks, business practices, research agendas and institutional structures throughout government and strategy." Therefore, this framework provides suppliers a pathway into the Public Sector cyber environment which is becoming increasingly prominent.

The Key Stats

£153 million spend value

3 year procurement

Call off contracts available

Direct award

Long term revenue and growth

Available to central government departments and all other UK Public Sector bodies, including local authorities, health, police, fire and rescue, education and devolved administrations certified cyber consultancy.
